

myTOMRA

Find the fun in recycling

Your customers live in a digital world, and with a TOMRA RVM your store does, too

Meet your customers' expectations for a great recycling experience at your store by making recycling a seamless part of life with the myTOMRA app.

myTOMRA

Turn recycling into revenue by making it easy for your customers to spend their returns with you

A simple, convenient recycling experience can increase store traffic, earn customer loyalty and open up new ways to engage with your store.

Put your store on the map so your customers know you're up and running

myTOMRA features your store's location on its mapping feature, so your customers can find you, see that your RVM is ready, and save your store as their favorite place to recycle and shop.

With myTOMRA, it's personal

Custom profiles, payout preferences, user statistics and barcode or QR code sign-in at the RVM create a tailored experience for your customers, and reward good recycling habits. Plus, custom APIs integrate myTOMRA with your store's loyalty program, incentivizing customers to spend more at your store.

“

Great app.
Made it simple to recycle the 799 cans and bottles I had saved up but put off way too long!

It was easier than I thought, so now I will do it regularly!

”

“

Great app and great recycling initiative. Easy to use and I love being able to see my progress!”

”

LET'S PUT RECYCLING TO WORK FOR YOU

TOMRA's vision is Leading the Resource Revolution, helping to manage our planet's precious resources, today and tomorrow.

We believe that Clean Loop Recycling is the simple solution for keeping used beverage containers out of the waste stream, moving valuable materials from single use to multiple use.

As a retailer, you're at the heart of Clean Loop Recycling. You play a critical role at the point where consumers buy and return their containers.

Let's put recycling to work for you, and together we can maximize the positive impact for your customers, for your business, and for the planet.

When you partner with TOMRA, your business can experience real benefits:

A great recycling experience for your customers

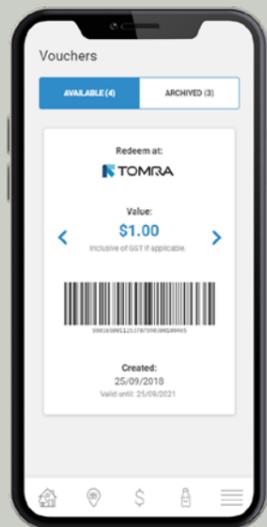

Be prepared for your customers when they're ready to recycle with tailored solutions, industry-leading technology and powerful digital tools that make their experience efficient, easy and engaging.

Efficient operations for peace of mind

Keep your store running smoothly with a reverse vending system that's accurate, secure and efficient and service that's responsive and ready to get you back to recycling anytime you could use a hand.

A smart investment for long-term benefits

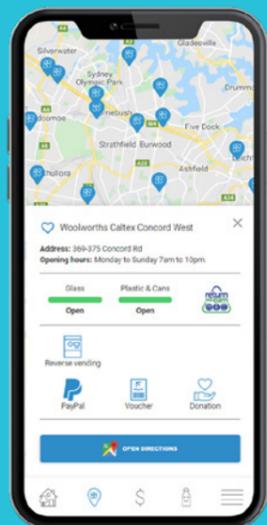

Choose a full-service partner with a global scale, extensive experience, high quality and continuous improvements that will keep your reverse vending system working hard for your business for years to come.

Product features

- Paperless vouchers at POS are secure, efficient, convenient and environmentally responsible
- Digital payout transfers deposit refunds to a preferred payout provider, like PayPal
- myLocation shows customers where to find you and lets them know your RVM is operational
- Achievements reward your customer for recycling at your store and keep them engaged
- With our APIs, you can integrate all of myTOMRA's functionality in your own ecosystem

*Digital payout providers differ based on market
Paperless vouchers require purchase of TOMRA Voucher Control

Do you have concerns over data security or privacy?
Are you concerned about data security, privacy, cloud-hosted services, or any aspect of TOMRA Connect? Let us know and we will help you!

Data security and protection: TOMRA Connect data is protected using industry-standard encryption protocols during transport from RVMs to the TOMRA Connect servers. The TOMRA Connect web portal is only accessible through HTTPS with SSL encryption. In situations with loss of connectivity or electricity at the RVM location, all RVM data will remain stored in the RVM and transmitted once operational state is restored, with no loss of data. TOMRA Connect offers full data isolation and separation across customer accounts. Recent model TOMRA machines communicate over standard HTTPS protocol (TCP port 443). The benefit of this is that only standard network ports need to be opened. Older TOMRA machines communicate over encrypted HTTP protocol (AES256 encryption over TCP port 80).

Bandwidth requirements: Bandwidth requirements for RVM operation and monitoring services are <20 Kbit/s based on 2,500 empty objects returned per RVM per day. For full utilization of TOMRA Connect's capabilities for multimedia content and consumer engagement services, a modern broadband connection capacity is recommended. Actual bandwidth requirements for such multimedia services will increase as a function of media size, upload frequency, the number of RVMs sharing available connection capacity, etc. Please contact TOMRA for assistance with analyzing your needs based on anticipated usage patterns, available bandwidth and the size of your RVM fleet.

Logging and monitoring: All TOMRA software systems are monitored. Monitoring of the systems is done on different levels from server level via system logs to data quality monitoring. All systems log appropriate levels of data to detect error situations or system malfunctions.

We reserve the right to make changes to specifications without prior notice. While every effort has been made to ensure all information contained in this document is accurate, TOMRA assumes no liability for any errors, inaccuracies or omissions that may occur. All products and offers are subject to country availability.
